

**Table 3. Correlation Coefficients from Analysis of Data in Table 1**

Criterion*	Correlation Coefficient† ( $\sim$ )	P Value
Consistency	-0. 529	<.001 (very significant)
Ability to bleed	-0. 418	<.001 (very significant)
Contractility	-0. 353	$0.01 > P > .001$ (significant)
Color	-0. 230	$\sim .05$ (borderline)

\*Number of cases, 60; number of degrees of freedom, 58.

†Computed according to Snedecor, G. W.: *Statistical Methods*, 4th edition, p. 138. Iowa State College Press, Ames, Iowa, 1946.
